

A Time To Every Purpose: Genre-Bending New Novel Thrills Readers as History, Science, War & Religion Collide.

Ian Andrew's 'A Time To Every Purpose' is impossible to pigeonhole into a single genre; a good thing – since the narrative thrusts readers from the end days of Christ through to the modern-day world, as history's most significant discovery and the murder of a Nazi official leave one woman with a dilemma. Does she use her considerable influence to reset history and in the process, destroy life as everyone knows it?

FOR IMMEDIATE RELEASE

United Kingdom – For safety, most new authors stick to a single genre and even then struggle to exploit its true character. This clearly hasn't been a problem for Ian Andrew, whose debut novel straddles a thrilling mix of science fiction, action, history, religion and even psychology.

'A Time To Every Purpose' leaves readers gripped to every page and debating the possible outcomes as Andrew explores the consequences of changing the past and future simultaneously.

Synopsis:

What if Jesus hadn't been crucified?

For two thousand years the religions of earth have been united in peace and harmony, and humanity enveloped in Nirvana. But in the early decades of the twentieth century, natural disasters, famine, disease and economic collapse bring catastrophe and a fledgling Nazi Party sweeps to power. Now, almost a century later, their brutal persecution of millions is a never-ending holocaust.

Yet a few heroes remain.

Leigh Wilson, inventor of one of the most significant discoveries in human history and a leading member of the Reich's Technical Division has kept a secret all her life. But plunged into the aftermath of the cold-blooded murder of a Nazi official, she is forced to make a choice. Will she use her power to reset history?

Will she destroy what she loves to save what she can only imagine?

A Time to Every Purpose is a thrilling mix of science and action, good versus evil, and the eternal question all humans face: Is this my time to act?

"Sometimes, someone has to step in and take drastic action that can change the future for our entire race and planet. My book explores this theme and the responsibility it places on the people holding power," explains Andrew. "It stemmed from reflecting on what type of peace would there be if the world had no religions, or alternatively, just one all-encompassing faith."

Continuing, "I think it's important to break boundaries, just like my characters are doing within the narrative. There are many literary grey areas that are usually ignored. I decided to dive into them head-on and leave my readers to pick apart the pieces in their own imaginations."

The results have been extremely powerful; with the book garnering rave reviews. One reader comments, "Very cleverly crafted, beautifully phrased, technically adept, and this guy really does know how to tell a story. It was very difficult to put down, and I ended up staying up late 5 nights in a row to finish it."

Another sleep-deprived fan said, "There is more to this than the standard post-war 'Britain under National Socialist rule' thriller. The characters are well developed and multifaceted... the plot zips along at a good pace sustaining my interest throughout (and sabotaging several attempts at early nights as I kept reading 'just one more chapter')."

The characters have also drawn favourable reviews, "This book is fast paced, informative, educational and fantastically enjoyable. The characters are flawed and not always likeable but that just makes them more believable."

About the Author:

Born in Belfast, Ian Andrew joined the Royal Air Force in the role of aircraft technician. Subsequently Commissioned as an Intelligence Officer, he served during a time that encompassed the last years of the Cold War through to the beginnings of the Afghanistan and Iraq conflicts. On leaving the military he relocated to Australia and is now surrounded by a resident mob of Kangaroos who bounce past his house each day. Currently working on a series of new Detective stories, A Time To Every Purpose is his debut novel.
